

İMALAT İTH. İHR. A.Ş.

19.02.2018

Our company has been manufacturing in the automotive sector for 20 years.
Around 5 years we manufacture different products to medical sector
(Cervical screw, nail, implant, implant superstructure etc)

We produce fue punch production with our advanced technology machinery park.
Our Punch is a lot better quality than other firms and some of our different features;

- a The tip is very sharp and allows graft removal without any default
- b Gives more grafts due to the quality of material used
- c Because there is no release at the tip, whatever the punch thickness is the same size in the hole but if you use 0.85 tips when 20% of the other products have a release, the wound or hole that occurs at the skin will be 1.02 or larger in diameter...

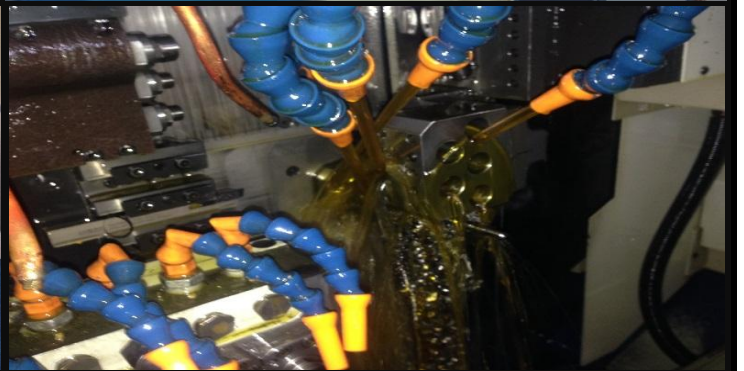

Besides all these, we have the technological capacity that we can manufacture the model you want.

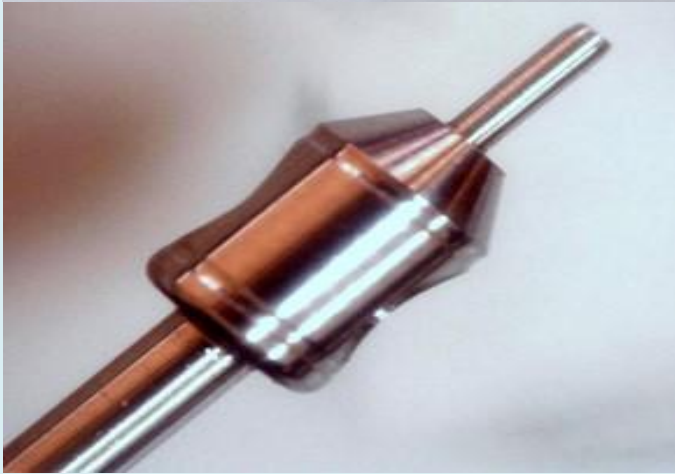

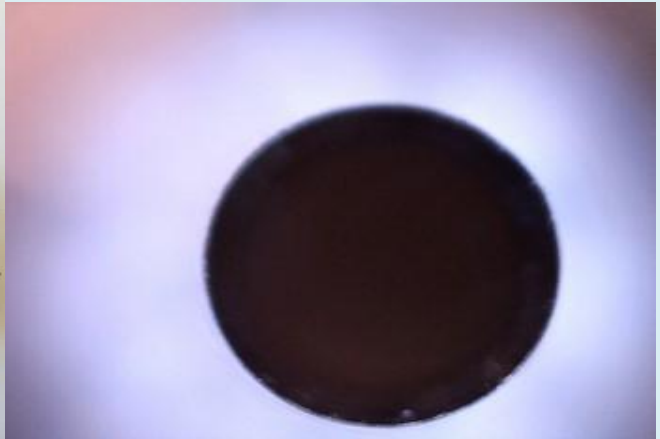

Our production :

Diameter	0,6 - 0,7 - 0,8 - 0,9 - 1,0 - 1,1	Straight and sharp tips
Length	3,0 - 3,5 - 4,0 - 4,5 - 5,0	Starred and sharp tips

Material:

Hard stainless steel
Hard stainless steel titanium coated
Titanium
